PREMIUM CLEANING KIT

By great demand of our customers, we have designed a premium cleaning kit. With this cleaning kit you can maintain your fixtures in a qualitative way. Only the very best products have been selected for you, products that we ourselves have been using ourselves for over 20 years.

Net price €60,- / 260 x 190 x 70 mm

1 x RENAISSANCE WAX

65 ML

Renaissance™ wax polish was originally developed in the British Museum in the early 1950's. It has a fine and crystalline structure. When thinly applied and rubbed out, the wax film is (and remains) crystal-clear, without discoloration either of the wax or the underlying surface. Renaissance wax is not acidic (pH neutral) and will not damage any sensitive materials.

No matter how often the wax is used there will be no loss of clarity, so that fine surface details are never obscured. Repeated use of the wax deepens the lustre, reflecting more light from surfaces and making them more 'lively'.

To use on: brass, aluminium, marble and bronze

1 x FOAM CLEANER

200 ML

A high quality foam cleaner that can be used safely on sensitive surfaces such as glass. Because of the soft mist there is no chance of residual marks. The foam cleaner is free of abrasives and has a pleasant perfume.

To use on: glass, brass, aluminium, marble and bronze

2 x ANTISTATIC DUST CLOTH
1 x PAIR OF GLOVES

Two antistatic dust cloths were added to the cleaning kit in order to apply all products correctly. The cotton flannel material is soft enough to use without worrying about scratching delicate surfaces. We recommend rinsing and air drying these cloths after each use.

To keep yourself safe and clean, one premium pair of gloves has been added to the cleaning set.

How to use

Apply a thin layer of product on a dust-free surface

Make a linear rubbing motion when polishing out

Shine bright!
